

"If it wasn't for the Diolase 10, I don't think I would have performed in 2010 at such a high level. My recovery has been amazing!"

MATTIE LARSON
US Champion Gymnast

"The orthopedic surgeon thought I'd need crutches after a femur injury, but BIOLASE® laser treatments solved the problem. I was pain free and crutch-free."

BURT BACHARACH
Award-Winning Composer

"The BIOLASE treatments I received got me back in the water faster than I ever thought possible. I instantly felt stronger and more stable—my ankle still feels 100%!"

TANNER GUDAUSKAS
World Champion Surfer

NON-INVASIVE

AS SAFE AS SUNLIGHT

NO DESTRUCTION OF TISSUE

EVEN DISTRIBUTION OF LASER ENERGY
over the entire treatment area

THE PERFECT COMBINATION of penetration
and absorption in tissue for pain management

The Diolase 10 has been shown to be effective for chronic and acute musculoskeletal conditions including back and neck pain, injuries from accidents, and athletic injuries to muscles and joints, through temporary:

- **Relaxation of muscles**
- **Relaxation of muscle spasm**
- **Relief of minor muscle pain**
- **Relief of joint stiffness**
- **Relief of minor arthritis pain**
- **Relief of minor sprains & strains**
- **Relief of minor muscular back pain**
- **Increase in local blood circulation**

FREQUENTLY ASKED QUESTIONS

WHAT IS LASER THERAPY?

Laser therapy is the external application of a specific wavelength of near infrared light to temporarily relieve pain and stiffness, increase circulation, and provide biostimulation.

WHY SHOULD I CHOOSE LASER THERAPY?

Laser Therapy is ideal for patients who have not responded to standard medical treatments for pain. With an extensive record of providing successful clinical outcomes to a wide range of patients, laser therapy has proven to be a trusted and sought after method for pain relief.

DOES LASER THERAPY HURT?

No! It is a non-invasive procedure. You may experience a warm sensation that is actually quite soothing.

WHAT CAN I EXPECT FROM MY FIRST TREATMENT?

Most patients report relief of muscle and joint pain and stiffness.

HOW MANY TREATMENTS DOES IT TAKE?

The number of treatments depends upon the diagnosis. Most minor conditions take approximately 6 to 8 treatments.

HOW LONG ARE THE TREATMENT SESSIONS?

Each session lasts between approximately 15 to 20 minutes.

HOW MUCH DOES IT COST?

The cost of a laser treatment will vary by practitioner, procedure, and locale, but a typical fee is \$80.

WILL MY INSURANCE COVER TREATMENTS?

Laser Therapy is not covered by any insurance at this time.

HOW SHOULD I PREPARE FOR MY TREATMENT?

No preparation is needed; treatments are handled like a regular doctor visit. A medical gown is provided if necessary so that the laser may be applied directly to the affected area.

WHERE CAN I GET LASER TREATMENTS?

Laser treatments are only administered by a *Certified BIOLASE® practitioner*. To find one in your area, contact our Training Headquarters located in our Los Angeles office at **310-873-4422** or log onto www.allbackandjointcare.com

MORE POWER and DEEPER PENETRATION mean shorter treatments, fewer appointments and faster recovery!

Mitochondria regulate energy in our cells in the form of *adenosine triphosphate (ATP)*. When cells become stressed, through injury or disease, mitochondria reduce the amount of energy to cells, which can lead to pain or inflammation. Scientific studies suggest that Laser Therapy helps mitochondria produce healthy ATP, by stimulating blood flow and reducing nitric oxide in damaged tissue.

"In 2010 I suffered from a cyst in my ankle and didn't know if I'd be able to compete. After several laser therapy treatments, I was back running and finished the season as the #1 sprinter in the world!"

CARMELITA JETER
US Sprint Team

Low Level Laser Therapy (LLLT) has been used to treat chronic and acute pain for over a decade. Drs. Michael and Maryann C Sheps of the All Back & Joint Care Group in Brentwood, CA worked closely with BIOLASE Technology, a leader in laser technology for healthcare, to create not only a fast way to relieve pain, but a revolutionary way of accelerating the healing process using Biolase laser systems.

Designed specifically for chiropractic, orthopedics, physical therapy, sports medicine, athletic trainers and pain centers, the Diolase 10's unique 940 nm wavelength and high power send more healing energy deeper into painful muscles and joints. The Diolase 10 can provide faster recovery with fewer treatments—non-invasively, and without side effects. Optimal tissue penetration and enhanced biostimulation provide most patients with effective temporary relief of acute and chronic pain, so you can feel like yourself again in no time!

Our many clinical successes stretch from high performance world class athletes, celebrities, and executives who needed quick results, to chronic pain sufferers who had all but given up hope of finding relief.
